Memo

To: Coley Price, Town Manager
From: Bill Dreitzler, P.E., Town Engineer
Date: September 27, 2016
Re: October 2016 BOC Meeting - Engineer's Staff Report

Please consider my staff report for the scheduled October 2016 Board of Commissioners meeting:

Hwy 210 Sidewalk Extension Project

NCDOT has reviewed our draft Request for Qualifications (RFQ) and provided us with two minor revisions. These revisions have been made. RFQ dates will be determined this week and the final RFQ uploaded to the NCDOT Partner Connect system. We anticipate advertisement within the next 2 weeks.

Kennebec Church Road Elevated Water Storage Tank

As of the writing of this staff report, we are still waiting on a review set of plans and specifications from our engineer. Once we have reviewed and approved the design, the project will be submitted to DWQ for permitting.

Johnson Landing Water Booster Station

All of the underground installation has been completed, the slab has been poured and the pumps have arrived on site. We anticipate completion of this project by late October.

Wastewater Inflow/Infiltration Evaluation

On March 18th we received zoom camera results along with the engineer's main line recommendations. In addition we received results from the manhole inspections and the smoke testing. We are in the process of reviewing this data prior to making further recommendations with regards to wastewater inflow/infiltration issues. **No new updates for the August staff report.**

Southern Acres Subdivision

Staff has provided the applicant's engineer with approval of the final sanitary sewer outfall construction plans. It is anticipated that the developer will begin construction as soon as the necessary easements have been acquired. Engineering plans for the subdivision have not yet been submitted to the town for review. The developer's consultant submitted the Pre-construction Notification for Nationwide Permit #14 to the Corps of Engineers on September 19, 2016. It is my understanding that the grading permit has been received, and all easements have been acquired and recorded. Based on this understanding, when the Nationwide Permit #14 has been received, construction may begin for the sewer extension from Chalybeate Springs to the project.

Rawls Church Road Water Extension

NCDOT has completed a preliminary review of the proposed water line alignment along Rawls Church Road. Based on the review, the alignment must generally follow 5-foot inside the roadway right-of-way. The plans are being modified accordingly. For the section through the Roy Lee Earp property, both Mr. Earp and Mr. Brendle have agreed to our boundary survey. We are in the process of finalizing an alignment through the Earp property so that a final easement map can be prepared. The alignment will be 10-feet inside the property line with the exception of three areas including 1) connection to Rawls Church Road, 2) crossing of the power easement, and 3) crossing of Kennis Creek. Our surveyor has provided us with a sample boundary agreement and a preliminary legal description. In addition, the

tree count survey within the proposed easement area has been completed and was provided to Mr. Earp at a meeting on September 13, 2016. We are still awaiting a final cost determination for the easement acquisition. We are targeting mid-October for permit submittals.

Asset Inventory and Assessment Plan Grant Application

Angier was not awarded an asset inventory grant (AIA) during this past cycle. Our application did not score high enough. Based on our discussion with Envirolink, we believe we can modify the application and improve our score for the next cycle. The re-submittal for the next round of funding is anticipated to be scheduled for the end of September. We have a meeting scheduled with Envirolink on Wednesday, September 28th and the re-submittal of the AIA Grant Application will be discussed.

Utility Rate Study

This project is on-going. We last met with Tim Baldwin, Envirolink, on September 7th with our next status meeting scheduled for September 28th. The September meeting will focus on the utility rate model. The October meeting will focus on finalizing both the proposed revisions to our utility policies and the rate model. Envirolink anticipates a November submittal of final documents with a presentation to the Board at our scheduled December meeting.

Construction Standards

The Construction Standards were adopted in March of 2000 and have not been updated since. I am in the process of reviewing the Standards for conflicts with the UDO. In addition, I will be assessing any construction standards that need to be updated to better represent current technologies and processes being used in the industry. This is an on-going effort.

Miscellaneous

In addition to the above major projects, I continue to provide support to the Town staff including but not limited to the following:

- Service on the Pre-Development Committee.
- Service as a member of the TRC including the associated engineering reviews.
- Assist with the Hwy 55 widening / Streetscape project meetings.
- Assist with the Comprehensive Plan being coordinated Holland Consulting Planners.
- Attendance as staff engineer at the Planning Board Meetings, Board of Commissioners Meetings, and Board of Adjustment Meetings.
- Meet with citizens on an on-call basis for issues predominately related to storm drainage.
- Assist Public Works on an on-call basis.

Sincerely,

A handwritten signature in black ink, appearing to read "Bill Dreitzler", with a stylized flourish at the end.
